

# TrySight Large Print Bluetooth Keyboard

Large Keys Bluetooth Keyboard with integrated mouse

The TrySight Large Print Keyboard is an easy to see keyboard designed for those with low vision or seniors who need to reduce eyestrain. Now you can write emails, text documents and have an easy way to access your iOS or Android device. But it's not just limited to Tablets and Phones. The TrySight Large Print keyboard also works on Windows! An integrated Mousepad with left/right buttons eliminates the need to purchase and connect a separate mouse. Since it uses Bluetooth you won't have to worry about not having enough USB ports to plug it in. Finally, a single piece solution that works on every device!
